

COVID-19 Support Initiative

The COVID-19 surge in India has brought many challenges, one of which is the loss of the breadwinner in many families, pushing them to the brink of imminent poverty. While there has been a lot of international and domestic support for immediate relief measures, as the pandemic wears on, these families need sustenance support beyond having their immediate relief needs met.

The IC3 Institute is helping women from families that have lost their breadwinners by empowering them with training and employment opportunities as career counselors within IC3's global network. **Our hope is that providing sustainable livelihood opportunities to the affected families will help them overcome the many challenges of the post-pandemic world.**

We will enable and empower 500 women from underserved backgrounds that have lost their family breadwinners to COVID-19 by:

Providing training and education to become career counselors

Connecting them to schools in their region to ensure sustainable employment opportunities

Upskilling to prepare them to join the modern workforce

Providing socio-emotional counseling and life skills training to ensure dignified living

YOU have the power to make a lasting change in the lives of these women and their families by supporting this initiative. Your contribution will provide immediate relief to 500 women in distress and empower them with employable skills and opportunities.

The IC3 Institute along with its partner institutions have already committed to contributing INR 24 million/~USD 338,000 to the initiative. We need your immediate support in raising INR 11 million/~USD 150,000 in the first round of funding to serve and impact 500 women and their families.
